The benchmarking section displays two mobile applications used for carbon footprint tracking and comparison:

- Carbon footprint & CO2 tracker** (The Capture Club): Shows a user's carbon footprint and offers options to offset it. The interface includes a "Carbon offsetting projects" section with images of solar panels and wind turbines.
- beCon - Carbon Footprint Calculator** (beCon Live): Provides a detailed breakdown of carbon footprint by category (e.g., French-style Solar, French-style Solar, French-style Solar) and includes a "Be Conscious" section with a "Be Conscious" button.

Medidor de huella - mantiene el avance
